# THE 25 VISIONS

This chapter contains the twenty-five visions I received from God and the insights that I understand about each vision. The visions are written exactly the way I saw them, and in the order, I received them. I saw all these visions in a ten-day period in July 1994.

## Forty-Year Drought

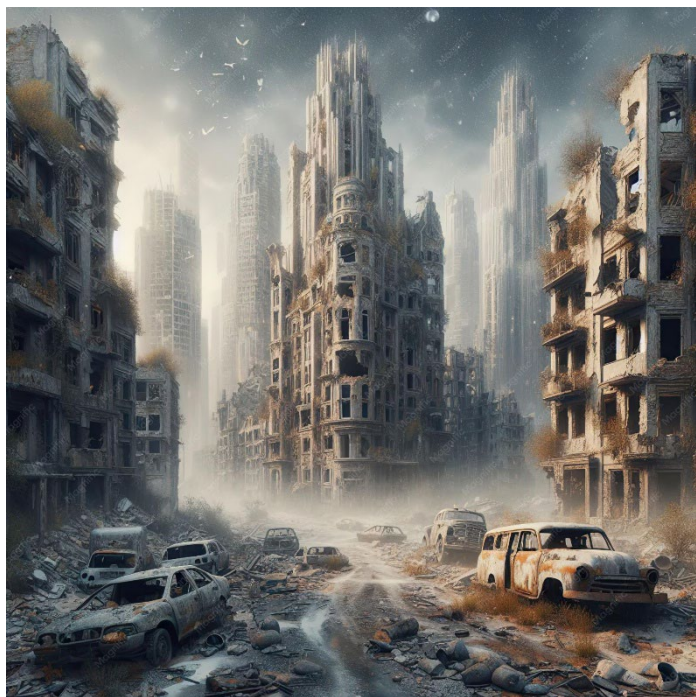

In a vision, the Holy Spirit gave me, I saw all the Earth being baked by incredibly hot weather. Each year, the weather became a little hotter. Then I saw heat waves amidst the summer heat. I saw each heat wave being hotter than the summers normal heat. The summer heat waves were merciless and unrelenting. These heat waves would climb another 10 to 20 degrees. I saw them setting new record highs. I saw some lasting a week and others lasting several weeks. All this continued to happen

until the super-hot summers reached their assigned limits. I don't know what the temperatures were, but what stood out in this vision was the heat's intensity. I could feel the heat in this vision. The normal summer temperatures continually set new records.

I saw a well-watered green earth turned into a dry, barren wasteland; a global desert that was very dusty from being baked in the sun. I didn't see very much vegetation - the land had been stripped of life. I saw these heated temperatures being unrelenting until the forty years had passed.

I also saw winters having temperatures that climbed into the hundreds having heat waves during certain weeks, but during other weeks, the temperatures dropped down to 30F below zero. I saw sudden bursts of freezing cold that lasted for a week to two weeks. The winters were so cold that thousands of people froze to death. Then I saw frozen corpses across the earth in a quick glance of the World. I didn't see much detail about these freezing killer winters, but most winters were hot and dry.

The super-hot summers were as merciless as the freezing winters; I saw thousands across the globe dead from the unrelenting heat. Then suddenly I saw a quick view of the Earth in winter and then suddenly I could see a quick view of the Earth in the summer. I was able to see time pass by quickly from year to year like a high-speed video. At first, the killer summers took only a few thousand lives, but later, I saw the hot summers had killed millions across the Earth. These summers lasted longer in duration than the normal months of summer. I felt the intensity of the heat from these hot summers.

Everyone knew these killer summers are sent from God, but the evil still did not turn from their evil ways. I saw vast multitudes cursing God instead of repenting from their evil ways.

I saw that after the wicked had died, the heat raged on until the forty years ended and only the morally upright and the remnant of people had survived. I didn't see how many people numbered the survivors. I did see that there will be pockets of people all over the earth. I didn't know when these super-hot summers will begin; I sensed that the final hot summers were more of a cleansing of the land.

Again, I looked and saw a mighty drought devour the World. There was no water anywhere except the oceans. All the vegetation in the cities, was gone; all the trees and beautiful parks had died and were desolate. I saw naked cities with very few weeds. The entire land mass had become a desert. I saw the rains and winter snows becoming less and less. The rural country was just as bad. All the Earth was barren. Most wells had gone dry, and the land was a wasteland. Rivers and lakes had dried up.

I saw many areas where the ground had cracked open and great rounded sinkholes had

opened. Some of the cracks were the size of very deep gorges like 300 meters deep, being 2 kilometers long and 300 meters wide.

I saw massive amounts of dust everywhere. The dust looked like small dunes of dust. I saw dust in everything and covering everything and everyone. I saw this dust in people's faces, eye lids, nostrils, hair, and sticking to their sweaty skin like glue.

I saw the entire Earth being subjected to a horrible drought. I knew that the drought will begin all over the earth at the same time. I saw God in control of it. I saw this drought become the most intense of all the judgments coming upon the earth, but I also somehow knew it is not the number one killer of people.

Knowledge suddenly came into my mind that there will be twenty years of a drought leading up to another twenty years of a killer drought. Then I saw the second 20 years of drought being a killer drought causing millions to die from the super hot summers. I saw each year of the drought becoming

a little more intense than the previous year. I saw each year becoming a little hotter than the previous year. I saw the last few years of the first 20 years, began to grow in intensity, leading into the remaining 20 years. I had a quick glimpse into the remaining 20 years. It was like standing on a mountain height overlooking a vast plain. The plane was like a time zone. I could see each year in the distance. Each year was separated by a winter. For each year I could sense the heat as I look on. Then I zoomed into various places on Earth. I had a quick view of human corpses all over the earth scattered in these various areas on the ground from the heat. I saw people who had fallen to the ground dead just from the super-hot summer heat. Then this vision ended.

## **Economic Recession**

I saw an economic recession occurring when the U.S. and Foreign stock markets suffer a major blow. I saw the markets tumble to half off from their peak. I didn't see any details of this coming crash or what caused it, but I did see a long recession before the stock markets climbed back. I saw the World never fully recovering from this recession. I didn't know how long the recovery will take, but only that it would be long and slow.

Along with this vision came a strong sense that there would be a few years of prosperity during recovery. I also had a strong sense that this recession would last ten years. Then I saw into the future that following this short-lived recovery coming a major economic collapse that caused worldwide monetary disaster for everyone throughout the earth, but it starts off as a recession.

## **Economic Collapse**

In this vision, I saw America suffer a total economic collapse. I also saw the entire globe enter an economic collapse. It all starts in America. I saw all the American stock markets collapse to zero. I saw all the money in America suddenly become worthless.

In one day, all credit stopped, and all banks closed their doors. I saw every countries monetary systems suddenly become worthless in one day. Then I was suddenly amidst the first vision, (the 40-year drought). During this vision I strongly felt that this financial collapse would happen sometime during the second 20 years of drought. Then knowledge enter my mind; “five years into the recession!” Then this vision suddenly ended.

## **Bankrupt Banks**

I saw, in another vision, all banks and lending institutions closing their doors in a single day due to a sudden economic collapse. I saw people in shock and disbelief when they saw bank doors locked. No one was able to withdraw any money. I saw the dollar become worthless. The rest of the world banking intuitions closed their doors following the USA dollars collapse.

I saw the central banking industry trying to solve the dilemma. I saw the governments scrambling with banks to resolve the problem. I saw money officials promising the people that the dilemma would be solved in a matter of hours. This became the topic of twenty-four-hours-a-day broadcasting on every network and news channel. I saw many television stations just broadcasting about the collapse and what everyone was trying to do.

**Across the economic world, I saw the banking industry panicking to get the economic engine running again. I saw panicked meetings of American government financial officials and foreign central bankers to get the problem solved, but nothing was solved. I saw this being 24/7 news broadcasting throughout the World.**

**I saw the first days turn into a week, and I saw the American public begin to realize that nothing was going to work. I saw millions of people hoping in the daily promises from the banking experts and government officials. I saw millions viewing a device in their hand and televisions hoping for a recovery. I saw people going to their jobs and wondering when the economic engine would start running again. By the end of the first week, I saw people across America and the World going into a panic when they realized they would never see their money again.**

**I was quickly shown, through the Holy Spirit, people in bewilderment not knowing what to do. Then I saw massive riots and pillaging break out everywhere. I saw everyone panicking, not knowing what to do. I saw law enforcement not being able to control the crowds and mobs. I saw millions arming themselves with guns to protect their families and property. It was unbelievable to see modern, educated people become barbaric. I saw Americans**

become so dumbfounded that they were unable to think straight and didn't know what to do. I looked and saw masses of people becoming chaotic. Hysteria spread through all the people throughout the entire earth.

I saw the elderly across the earth. Throughout the entire earth, most of them just sat in their homes and waited, believing all they heard from the media, but they were not safe in their homes - as pillagers broke in to loot their homes. It was horrible to see how retired people responded to the growing dilemma. They couldn't do anything being weak and frail.

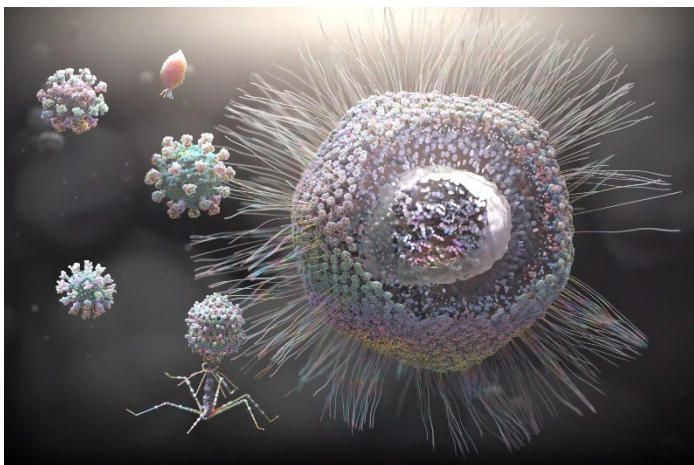

I saw the banks remain closed for the remaining years of judgment. I wondered when this single day event occurs, but no date was given to me. Then I understood that this one event triggers many other judgments. Then this vision ended.

## **Killer Viruses**

**This is the most vivid, graphic vision I had. I saw the entire earth and then I saw killer viruses spreading throughout the World. It seems that there are 3 distinct viruses that I saw quickly spreading throughout the earth, but each one was at a different point in time.**

**Then I saw a pool of water in the shape of America. I was in the sky looking down at this pool. The pool was like a mirror, calm and peaceful, no ripples. I saw at one end of the pool, that a virus started in a city and spread across America, all the way to the other coast, rather quickly within a few days. The virus was like a single ripple in this pool not multiple ripples, that sped to the other edges of this pond. Then after a time passed, another ripple started from the opposite coast. It was another virus. After another period of time a third ripple began, another virus spreading across America in the same way. I saw only three ripples.**

**I understood that millions upon millions died - an unbelievable death toll. I saw many infected people survive these viruses. I saw that many who survived the other judgments not surviving these viruses.**

It seemed that this vision of viruses occurred several times during the other judgments and ended a few years before the drought ended. I saw all the nations so fearful of the viruses that no one dared to come to America or travel to another country. Then this vision ended.

## **Animals Will Rule**

I saw a vision, wild animals increasing in numbers and venture into cities and towns to feast on the dead and attack the living. I saw that people came to fear these predators. I saw many people being attacked and eaten by these animals. I saw those in rural areas meeting the same fate; they had little protection. I saw bears, cougars, and wolves, lions, tigers, having no fear of humans.

I saw packs of vicious dogs in cities unafraid of attacking people, who grew very fearful of them. I saw these packs numbering from 10 to 20 dogs. I could see these dogs were once domesticated but had become strays and packed together for hunting humans for food.

I saw snakes increasing in numbers infesting the cities, looking for rodents but also attacking people. I saw in marshy areas that various breeds of snakes becoming large up to 30 feet long that

attacked much of the rural country. I saw people fearful of these snakes.

Then I saw insects of several types becoming major plagues to the earth. I saw huge swarms of different kinds of insects at different periods of time sweeping through parts of the earth destroying all life in their path. These swarms numbered in the billions. I saw millions of rats and other rodents in all cities. I saw swarms of them attacking living humans and feasting upon them. Then this vision ended.

## **All Wealth Gone**

In a vision, I saw all the savings and investments of all Americans suddenly gone. In this vision, I saw the stock market totally collapse. All homes, real estate, precious metals, and land became worthless. Across America and the World people suddenly discovered they had no wealth, not even in the form of gold or jewelry. I saw that even the wealthy, having secret foreign accounts, became broke and found themselves in the same position as others. It was the survival of the fittest, and thousands of people were trapped in every country. The order of the day was survival, not wealth.

I saw maddened frenzy people store up whatever they could; even the wealthy had to become streetwise very fast. They did not react as quickly to the calamity as the poor had. They became wimpy before the poorer classes, who had a distinct advantage over the wealthy - the poor classes beat the wealthy to what essentials were left. I saw that what was once valuable no longer had any value. Then the vision ended.

## **Vicious Riots**

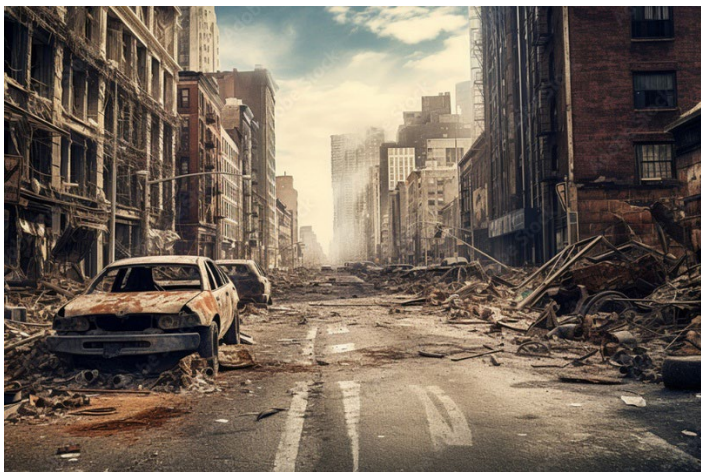

In this vision I saw only a short glimpse of vicious, deadly riots that occurred all over America after the economic collapse. I saw lots of angry people expressing their rage on everyone and everything. The police and the military were unable to suppress the riots, since about everyone was taking part in them. No safe place was to be found since all America became one big riot.

I saw much property destroyed because of the riots. I did not see anyone killed, but I knew that people will die from the riots. The riots were aimed mostly at the government and the wealthy, which the people were blaming for the financial collapse.

**I saw the entire world plunged into riots in every country. Not one country will be without riots. Cities and businesses were torn into rubble. I saw much destruction in all the cities of the earth. Then this vision ended.**

## **Forty Years of Judgment**

**In this vision, I saw America and the World suffering through forty years of judgments. I saw God starting with twenty years of light judgments and then twenty years of severe judgments. I saw myself standing before America, receiving instructions and visions from God concerning America and all other nations. I saw God giving me orders and commands as to all that He would be doing to America. I saw God giving me authority over all the nations of the earth and commanding me to tell everyone what would be done and why.**

I saw these judgments beginning with America then quickly spreading throughout the Earth. God instructed me to wait till I was forty years old in the Spirit and then I would begin this ministry. That would be in 2014. Then this vision ended.

## **Famine**

I saw a vision of a great famine that the Earth will be thrust into. I saw millions of starving people, unable to escape anywhere. The drought created a famine that spreads throughout every country on the planet.

I saw drought affecting every farm and ranch on the globe. I saw the underground water tables shrink away; even many deep wells dried up, leaving no water for crops and livestock, which all died. I saw no one having any oasis to escape to. I saw the entire country of America and all Europe suffering more intensely than most other countries with a long, devastating famine. Then this vision suddenly ended.

## **Religious Persecution**

I saw a vision of a religious persecution against every type of religion following the economic collapse. Many people will know that these judgments and disasters are from God. I saw much of the population enraged with anger and hatred against God and His supposed people. I saw this persecution lasting for a short while, and then the persecution died off as militias become more prevalent and powerful. Only when survival became a necessity did the persecution cease.

I saw church buildings being torn down or burned. I saw Christian homes destroyed. I saw religions of every kind come under attack. I did not see any death or torture, but that doesn't mean that will not happen. Then this vision ceased.

## **Cities Burning**

**In a vision, I saw the cities of America burning. I saw fires raging through all the cities. Not one city escaped the fires. I was in the middle of this catastrophe. I did not see the fires start up or what caused them, but I saw them raging out of control. Some cities were mostly burned while others were only partially burned. It was difficult to grasp the massive fires I saw. The fires burned until they ran out of combustibles.**

**Then I had an overview of all the cities in America and could see they were all on fire. Then I would suddenly be amidst a burning city with people running blackened with soot and burned clothing. Then I would suddenly be in another city that had just finished burning with smoldering ruins. Then I found myself in the middle of a city's downtown gazing up at skyscrapers that were mostly burned-out hulls with the lingering smoke drifting from parts of a few buildings.**

**Then suddenly, I saw entire suburbs burning. I saw some neighborhoods partially burned, but there were many suburbs that didn't get burned. I saw thousands of houses burning in just a few days.**

**There was no one to extinguish the fires, and there was no way to stop them. Fire equipment could not respond due to no fuel for the trucks.**

**I saw people fleeing from their burning neighborhoods, and I saw these fires lasting several days. Then, that was the end of this vision.**

## **Tress All Dead**

**I saw a vision of forests burning. I saw many wildfires that were ravaging the forests; all but a few forests were destroyed.**

**I saw massive amounts of smoke polluting the air all over the earth. I saw the smoke causing people to be sick. As I looked, I saw people being miserable due to the smoke. I saw many people with respiratory problems. Then, I saw no trees, plants, or vegetation of any type in the cities. I saw vast areas of rural America covered with burned trees still standing. I saw in other countries burned trees and entire forests burned. These areas looked like black ash with blackened poles sticking up out of the ground.**

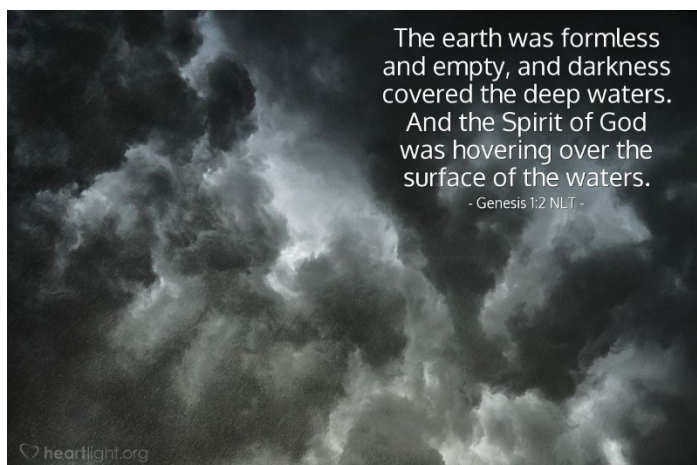

**Then I saw the drought had destroyed much of the Earth's beautiful trees, including those in the beautiful national parks. Only a few trees survived.**

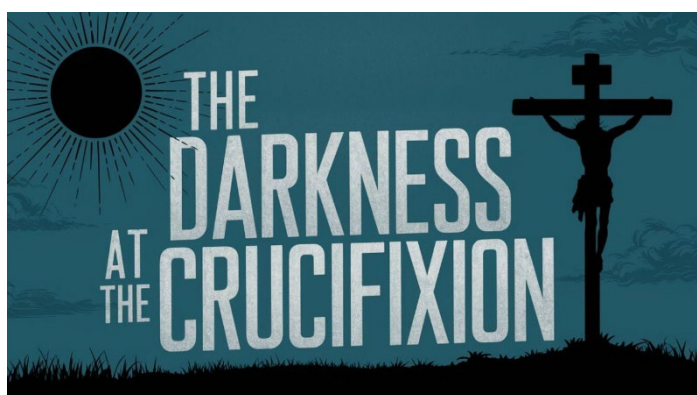

Then I saw these dead trees being burned with fire.  
Then this vision ended.

## **Darkness over the Cities**

I saw, in a weird vision, a strange darkness come over all the big cities of America, unlike the darkness of the night. It wasn't caused by fog, haze, or clouds. It was a darkness I had never seen. It was a very thin darkness that lessened the sunlight slightly and there was an eerie power to it. I felt the power of this darkness.

Along with this darkness came a depression that made people want to die; it sapped their strength. I saw people being depressed, always feeling heavy. I saw people having restless and sleepless nights.

This darkness came on slowly, over a period of months. Those in cities didn't recognize it at first because it had subtly crept over each city. This darkness hovered over many of the cities in the United States, but not in all the cities; everyone in these cities sensed it. I didn't see this darkness occurring in other countries. Then this vision suddenly ended.

## **After the Economic Collapse**

I saw in a vision, after the economic collapse, people forming gangs and militias to pillage and loot. I saw mini armies in every city of the world. I saw neighborhoods and inner cities form their own militias to fight the roaming militias searching for food, water, clothing, and other essentials. I saw other militias that had formed that were just roaming gangs. They would invade a neighborhood and stay there long enough to gain strength to move onto the next neighborhood.

I saw handguns being the most widely used weapons.

**I did not see any government intervention because there was only a skeleton military, and there wasn't any way for the government to deploy troops to the cities.**

**I saw each person, gang, and militia having to fend for themselves. I saw that the only way to survive wild animals, roaming gangs, and hostile militias, was to become part of a militia. I saw those who were not with a militia being exploited and killed.**

**I saw entire families involved in the militia wars. Husbands, wives, even children had to fight roaming militias and gangs with handguns. I saw hundreds of battles being waged. I saw that to survive, everyone had to belong to a militia. I saw that each war was bloody and costly with much death and wounded victims. I saw fathers, mothers, and children being shot and dying.**

**I saw that ammunition became the only currency in America. I saw smugglers, for a short time, from other countries smuggling in ammo to America. This became a great business but was short lived. The gangs or militias with the most ammunition would beat the other gang or militia. I saw lots of people shot in these battles. Then this vision ended.**

## **Skeleton Government**

In another vision, I saw the government of the United States. as a bleak, thin government that was powerless due to worthless money and corruption. I saw that most people didn't want to work for any government because those governments had nothing to offer except shelter and some food.

All militaries were reduced to a handful of personnel who were provided just housing, clothing, and food for soldiers. I saw these soldiers just protecting their own bases.

I saw other nations laughing at the United States; it became an embarrassment to represent the American government. Then I saw that the American government had lost most of its power and prestige. The once glorious powerful American government was reduced to a pile of trash.

## **Corrupt Presidents**

I saw a vision of the next presidents. I didn't see who they were - I didn't see any facial details. Each president was vile and corrupt. They stole and were involved in scandals and even murders. God revealed to me that He would appoint evil, hideous

people to command America and all nations until the judgment is complete.

Then I saw other nations having leaders who are vile and corrupt. I saw National Leaders stealing all they can from the coffers of each nation. They are not leaders but thieves to steal as much as possible. They didn't care about the country's people. These foreign leaders were corrupt with greed for all they can steal. I saw many countries take matters into their own hands and together the entire populace would rise up to oust them from their leadership positions.

I saw other nations laughing at the American presidents because of their corruption and foolishness. I saw God use these foolish national leaders to tear apart every government. These people are part of the reason America and other nations undergo financial collapse. It was very clear to me in this vision, that God used corrupt people to usher in the destructions appointed for America and all nations. I saw corrupt people caring only for themselves as American presidents. I saw each one plotting as to how to enrich their pockets from Americas treasuries.

Then I saw, near the end of the 40 years of judgment, few Americans caring who the president was. There was nothing a president could do except to make matters worse. I saw no one attempting to oust any corrupt president. Then this vision ended.

## Windstorms

I saw a vision involving many violent windstorms. I saw God sending mighty windstorms that caused great amounts of dust all over the earth that got into everything making life miserable. I saw these windstorms blowing great amounts of dust across the earth that lasted for weeks. Everyone was affected by the dust, and I saw millions cursing God because of it. I saw the winds driving people crazy. I saw the winds causing people to be at each other's throats. I saw people grow sick of the wind.

I didn't know what the speed of the winds was, but they created huge amounts of unbearable dust. I saw people whose skin was covered with dust as were their eyes and nostrils. I saw people rejoicing when the windstorms would stop.

I saw that every year, there were several long-lasting windstorms. I didn't see their intensity or when exactly they occurred, but they were violent and relentless.

Everywhere I looked there was a chalky, fine talcum dust. I saw in some cities that the very fine dust, unlike sand, was piled up to six feet against buildings.

Suddenly, I was amidst one of these windstorms. The dust and sand were stinging on my skin. I couldn't see much of anything. I needed goggles to be able to see. When I would open my eyes to see, the dust would be driven into my eyes, and I was forced to close my eyes. When I breathed, some of the dust entered my lungs causing me to cough. I had to lean against the wind as it was strong. I saw debris sail past me – pieces of wood, sheet metal, and dried branches. I could feel the force of the wind and driving sand and dust.

Everywhere anyone would go there was a layer of dust on everything. Nothing was clean. I saw people coughing and having sinus problems due to all this dust.

I saw the wind driving wildfires that spread across vast amounts of land quickly. The winds drove the fires across rural countries and through the urban neighborhoods. Then suddenly the vision ended.

## **Survivors in Rags**

In another vision, I saw millions of people with little clothing, just rags, even in winter. Clothing became a valuable commodity. I saw the coming militia wars fighting for clothing, food, and water. I saw that clothing was an extremely valuable commodity throughout the earth along with food and water. I saw filthy dirty people in filthy dirty rags. In this vision, I had a sense of smell and could smell the filthy people; everyone stank since there is no water to bath in. People didn't wash their clothes since water was so scarce. I saw many people very cold in the winters; they huddled together for warmth. In the summers, I saw them without hardly any clothes.

**Everyone I saw was sweaty, stinky, and dirty. Then this vision ended.**

## **No Lakes or Rivers**

**In another vision I saw all rivers and lakes dried up, even the big rivers and lakes. They were all reduced to open, dusty pits. I was amazed that so much water had vanished. I saw every reservoir and lake dry up. I saw several years when there was very little snow in America's Rocky Mountains. I saw the same in Europe, and in South America. This was a startling vision.**

**Then I saw the dried ground split open and form huge gorges and deep sinkholes. I watched a crack split open in the Earth that was a few miles long and a thousand feet deep. It developed into a gorge.**

**In another country I saw a sink hole develop. It was circular. At its beginning it was only 50 meters wide, but it continued to enlarge as all around the perimeter the ground kept crumbling into the sink. It eventually becomes several hundred meters in diameter. Its depth was unknown to me.**

**I was then ushered along by the Holy Spirit to see the dried riverbeds and lake beds all over the earth. For me it was difficult to believe that all these rivers and lakes where dust bowls. A few of the lakes looked like meteor craters. The riverbeds looked like long miles of dry canals likened unto another planet. Then this vision ended.**

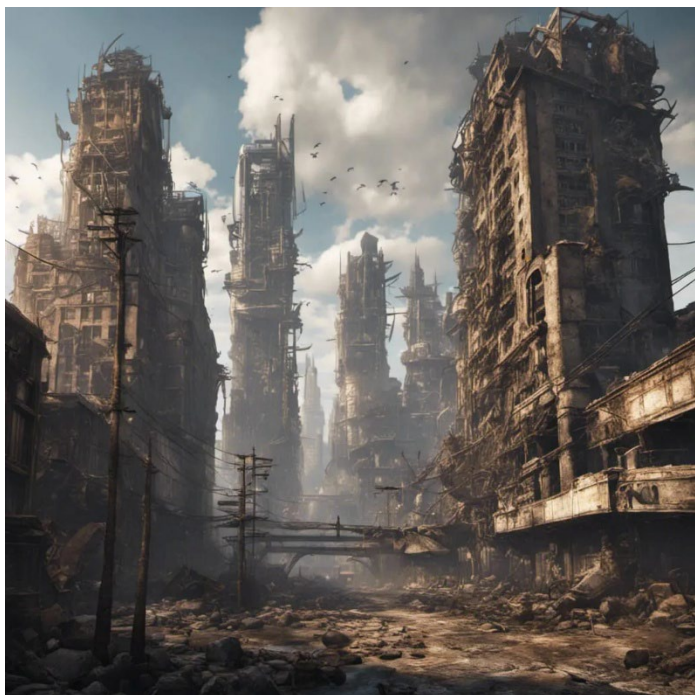

## **Corpses Everywhere**

I had a vision in which I was standing on a wide downtown city street with tall buildings on all sides. This was a sickening vision. I saw human corpses scattered here and there; two or three bodies together in some places, and individual corpses scattered around. There were not hundreds of bodies, but every city block had one or two. They were on the sides of the streets or the sidewalks.

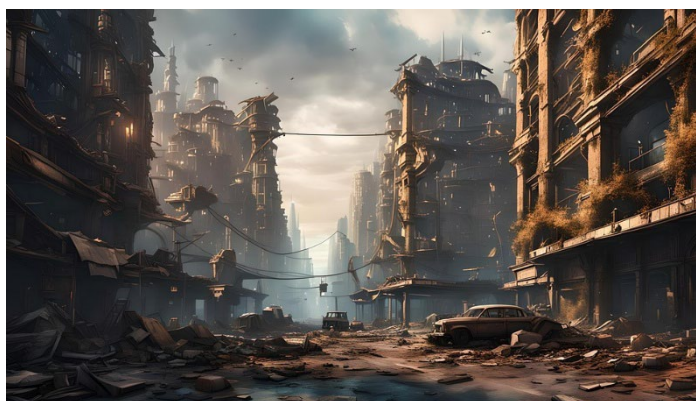

I was taken, by the Holy Spirit, to another downtown that had not been burned. It was as if I was walking down the middle of the street but wasn't walking. I was floating above the street about 3 feet in the air in an upright position. The Spirit was slowly ushering me along the street so that I could turn my head and see everything all around me.

The buildings were vacated; they had been gutted, and their windows were broken. There was no traffic or people walking about; there was little noise. It was hot and miserable, and the street was littered with trash, office rubble, and burned cars. I saw a few people huddling in small groups next to the buildings. They were filthy, starving, and pitiful.

I saw the bodies of those who had died only hours earlier which were covered with insects and being eaten by rodents. I also saw corpses that had been lying for days and weeks, openly rotting. I saw skeletons, bones and skulls scattered about the trashy streets.

Then I was taken swiftly to the end of one street to a parking lot that took up a quarter-acre. To my horror, the lot was filled with bodies tossed one on another until you could not throw another corpse any higher. The bodies had been thrown there by “body details” of two or three people. The body details were very few, and they eventually disbanded because the insects and diseases spreading. The stench was horrific – the most awful smell.

I saw many dogs, cats, rodents, and birds eating the corpses. Packs of dogs were making meals of human remains. The place reeked; insects were breeding in the corpses, as were diseases of all kinds.

It came to the point that where a person died was where that corpse stayed to decay. I was amazed to see so much death. Then this vision suddenly ended.

## **Empty Cities**

**In another vision, I saw many of the cities in America lifeless. I saw this vision after the fires and diseases had passed through; after everyone had died. This vision was close to the end of the forty years of drought. The only survivors were the remnant and non-evil people. Then I was whisked along at a tremendous speed and passed through many other cities in the earth - which were also empty hulls. When I arrived at a city, I would suddenly be slowed down to a crawling speed so that I could observe a part of the city for a minute or two. Then I would travel to another city the same way with tremendous speeds. This happened many times. Though every city was different, they were just empty hulls.**

**Then I was taken along by the Holy Spirit and had a quick tour of many of the cities in America and other countries mostly in Europe, after everyone had died. I was ushered through many of the big cities and allowed to look at the remains of downtowns. I saw there had been a lot of destruction. Some tall buildings were standing, but they were empty hulls. I saw many places where dust was several feet deep. The heat was receding to normal temperature ranges, between seventy and ninety.**

**The darkness had departed. The windstorms had ceased. There were no more animals to be seen. Seeing cities with no life was eerie. I saw no trees, grass, or weeds. I felt gentle breezes that flowed through empty, gutted buildings. The devastation had ended, but I was horrified by the aftermath of the destruction God had wrought. A great stillness remained over the half-burned and lifeless cities.**

I saw no inhabitants in any of the cities. Even the dust yielded no footprints. The dust had settled, and the air was clean. The only movement was gentle breezes. I could hear the gentle breezes as they flowed through the streets and buildings. All was calm and peaceful. I was the only one in each of these lifeless cities. I was allowed to walk down some of the streets of each city. The only sound and movement were from the gentle breezes. In this vision I could hear and feel the gentle breezes. It was so profound that I will always remember the calm gentle breezes of this vision. There was no more fear of finding someone trying to kill for their survival.

The animals disappeared along with the reptiles and rodents. The insects had vanished. I was the only one present. Most of the dust had covered the skeletons, rubble, broken glass, and metal trash of broken computers, desks, chairs, monitors, etc. The super heated temperatures were gone. Rain had not yet returned so no new plant life had begun to grow. God wanted me to observe the barren cities before life would begin to return. I felt serene and peaceful. Then suddenly this vision ended.

## **Meteors Strike the Earth**

I saw an amazing vision. I did not have any time frame as to when this catastrophe happened, and I did not know if it occurred in America. I saw a large meteor slam into earth. I saw it hit part of the ocean and part of a continent. I noticed it did not strike either of the Polar Regions. I saw its size in proportion to the earth, but I did not see the aftermath. I don't know how much destruction it caused to the earth. I noticed it was not a glancing blow but a direct hit. When it hit the earth there was no fiery blast like a nuclear bomb as depicted in artist drawings of meters slamming into the earth. It was just a huge amount of debris blasted all over from the crash site. As soon as it hit the earth, that part of my vision ended. I do not know its exact size, but it was very big being oval in shape.

I saw a few years pass by, and I saw another meteor crash into the earth. This part of the vision has even less detail than the first part. I did not see the second meteor hit the earth, but I knew it struck. This second meter is smaller than the first one. I saw it just as it was entering the atmosphere, then this vision ended.

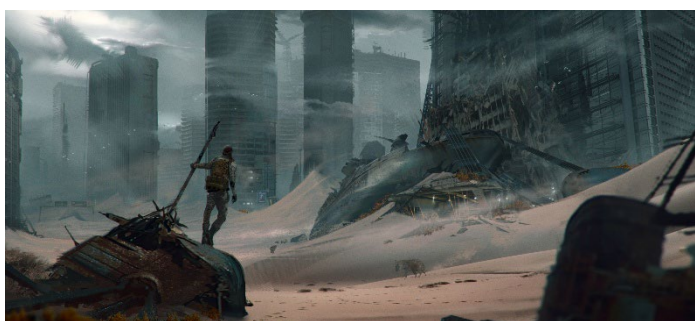

## **The Population Destroyed**

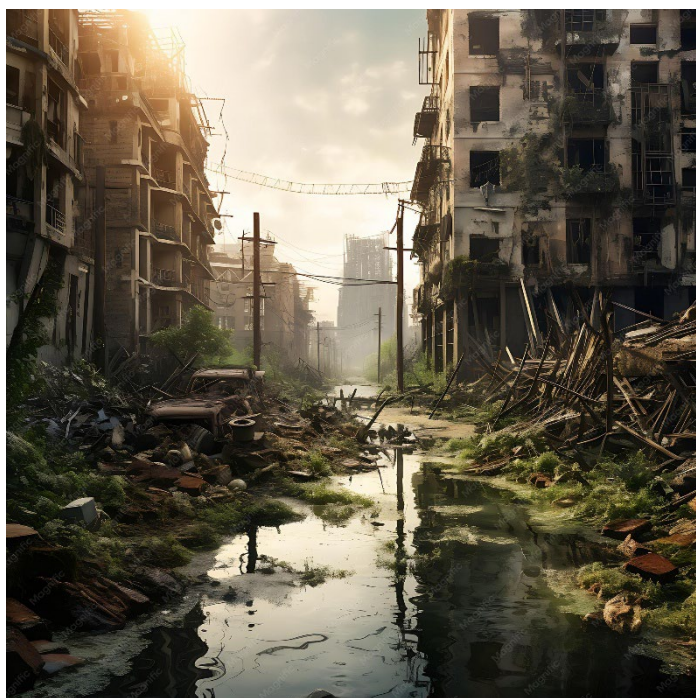

In one of the visions, I saw America after God had finished all the judgments except the drought. Again, I was traveling through many of the cities being ushered along by the Holy Spirit at a high rate of speed. I saw non-evil people that had survived all God's judgments. God had destroyed every single one of the wicked and corrupt people in America. I was amazed that He had done this.

It was an eerie sight to look over all America, cities, and rural areas alike, and not see a single wicked soul alive. I was horrified to look upon such a vast nation that had been home to so many just a few years prior to this vision, and not see very many people. This vision frightened me immensely; I'm so used to seeing multitudes going about their daily activities.

Cities were almost empty of any humans; all that remained were empty hulls of buildings. I was whisked along at a high rate of speed and shown all America in a few minutes. The only humans I saw were those of the non-evil, but I saw the drought continuing, full strength. The darkness had vanished, the winds had stopped, the lakes and rivers were still empty. At the time of this vision, the forty years were not over. Then this vision suddenly ended.

## **Other Nations Just Watch**

In a vision, I saw all the nations of the world watching all of God's judgments begin to unfold upon America. I saw a few nations trying to send aid the first few weeks, but they eventually stopped because they understood these judgments were from God. I saw a great fear come over all the nations. They all knew that America was being judged and that in a few days they were next.

They watched what God performed. They were too afraid to set foot on American soil because of the viruses. Not one of them even considered invading America. An invasion would mean suicide for any army since everyone in America owns a gun.

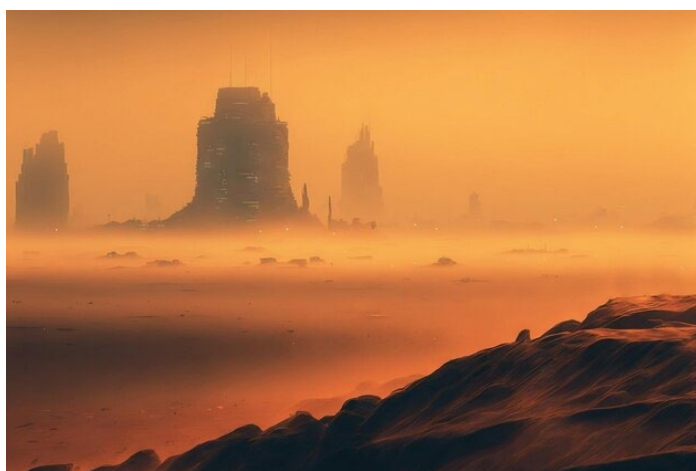

What stood out was the amount of great fear that gripped the world. Every nation was horrified and full of great fear. The nations realized God also was going to be judging them as they saw America being judged. As they viewed the news networks great fear came upon everyone worldwide. They knew that this was going to happen to them in just a few days. Then this vision suddenly ended.

## **What I Did Not See**

Although I had twenty-five visions of judgments, that does not mean there are not other forms of judgments coming to the Earth. There may be a few other prophets God will raise up to proclaim of other judgments from Him; they will have details about what they see or understand just like in this book. God usually sends more than one messenger especially when involving the entire Earth.

I do know God will send other judgments upon America, including an earthquake. You can say that America is in bigger trouble with God more than the rest of the nations. There are other events I know about and there are other judgments I have seen. It may be this quake is “the big one” Californians boast about.

There may be several earthquakes. Yellowstone may blow. The only detail I know is that a part of America is going to “rock and roll.” For now, God has chosen not to give me any details about the coming quake or quakes. Since having these visions, I have received dreams and visions of a lot of volcanic eruptions around the earth. I also saw a lot of dream visions of tornadoes in America.

I did not see great hail stones from storms. I didn't see any kind of hurricanes. I didn't see floods. I didn't see an invading army. I didn't see any assassinations. I didn't see a U.S. Government takeover. I didn't see Marshall Laws. I didn't see any large amounts of land break away from the continent. I didn't see the United States become flooded by ocean water from the melting polar caps. I did not see anything about terrorism. I didn't see the use of nuclear bombs or missiles. But this doesn't mean that any of these possible calamities will not occur.

**I know God will be sending other judgments through nature and population rebellion, but I have no details about them. Other forms of judgments may be minor or major in comparison to the judgments I saw. As time passes, I know my Father will be revealing more events that will occur upon this Earth. His future revelations to me may not be in the form of visions. Instead, I may just suddenly know what is to occur. He does this with me.**

**I know that there will be survivors from all these calamities. Those survivors will be from the remnants that prepare for the coming mess. There will also be those who survive apart from the remnant. Those survivors will endure a great amount of suffering.**
